As legal requirements such as the European General Data Protection Regulation (EU GDPR) are developed and enforced, together with rising risks of cybercrimes, data protection is getting more and more important. Organisations have to demonstrate that they take managing privacy and cyber security seriously.

EU GDPR has been already applied across all EU member states since 25 May 2018. This reform has significant implications for business, not only for those based in the EU, but for all organizations operating within the EU market. It doesn't just apply to organisations – unless processing for household purposes, it also applies to individuals.

For the first time, monetary sanctions of up to 4% of global annual turnover will apply to breaches of the regulation. It also includes additional measures to protect the personal data of EU citizens. We understand the value of data to your business and the serious implications of a data breach.

Enroll now to have a comprehensive understanding on EU GDPR and cyber security. Seats are limited. First-come first-served.

Honorable Charles Mok, JP

Charles Mok, is the Legislative Councillor representing the Information Technology Functional Constituency, member of The Professionals Guild. He has been serving the ICT industry for more than 20 years. He is currently the Vice Chairman of the Professional Commons, Honorary President of the Hong Kong Information Technology Federation and Founding Chairman of the Internet Society Hong Kong.

Charles is active in public services with a view to upholding the core values of Hong Kong of which include democracy, liberty, human rights, rule of law and integrity, and is serving on various advisory bodies in the Hong Kong government, Hospital Authority, WKCD, and higher educational institutions etc.

Charles graduated from Purdue University in the United States with his Bachelor and Master degrees of Science in Computer and Electrical Engineering.

Mr John Sullivan

Senior Consultant,
BSI Professional Services

John has been working with the BSI Cybersecurity & Information Resilience (CSIR) team for 5 years. In this time John has worked across a variety of BSI's professional services teams including the Digital Forensics & eDiscovery team, the Information Governance team and the Training team. During this time John has held the positions of technical consultant, training course tutor, project manager, service delivery manager and external Data Protection Officer (DPO). John specialises in managing global projects with large international clients from a variety of different industries.

John is a Certified Information Privacy Professional (CIPP/E) and a Certified Information Privacy Manager (CIPM). John also holds project management certifications from the Project Management Institute (PMI) and Prince II.

Mr Phillip Chan

Client Manager
BSI Hong Kong

Phillip started his career in Information Technology sector as a trainer and later as a consultant providing project implementation and consultancy services on various types of IT projects. Starting from 2000, Mr. Chan was dedicated to be in charge of all the IT security and risk issues of Cathay Pacific Airways Limited (called CPA) when he worked for IBM China / Hong Limited and Automated Systems (HK) Ltd. His key role was to establish and implement the IT security and risk management process and procedures including the BS 7799 (former version of ISO27001) management system from zero to fully functional and also to manage the day to day security operations, incidents, security related projects and auditing for 3,500 office user + 20,000 crew's IT security and risk related issues afterwards.

Mr. Chan has extensive management systems audit and training experience in information technology sector. Audited clients including Hong Kong Government departments, multi-national information technology service providers and more.
